

Software and networking for online gas chromatographs

MON2000 PLUS! is the versatile software solution for process gas chromatography analysis. It provides configurable auto-sequencing collection and storage of data analysis from the gas chromatograph controller or a network of controllers. Combined with a network and remote access from your laptop or PC, you can collect, store, and print data from any location. MON2000 PLUS! gives you more control over analysis reports with ease of setup and configuration that requires minimal user instruction time.

MON2000 PLUS! Capabilities

MON2000 PLUS! software provides you with remote data collection and storage capabilities and is designed to accommodate your measurement and maintenance requirements. All of the features that you currently utilize on your MON2000 enabled workstation, plus:

- Auto-sequencing function that enables gas chromatograph analysis runs that follow a pre-defined stream sequence

- Freely configurable and securely communication connection over RS-232, RS-422, RS-485, Ethernet or modem link
- Extensive variable reporting methods integral to MON2000 PLUS!
- Ability to configure a single poll command to acquisition a single parameter or configure several poll commands to acquisition hundreds of records
- User-defined polling time/frequency (per gas chromatograph)
- Reports stored in text files (*.txt) or comma delimited files (*.csv)
- Polling control configuration for the results you want:
 - Chromatogram on Archive
 - Chromatogram on Alarm
 - Analysis results
 - Event logs
 - Trend analysis reports
 - Time-based averages
 - Alarm and maintenance logs
 - Calibration reports
 - Archived data reports

Manage your process with the added functionality of **MON 2000** *PLUS!*
