

Improve operational efficiency

Accurate and efficient operation of oil and gas metering equipment is critical to any installation handling significant volumes of fluids.

Effective operations and maintenance practices not only result in greater operational efficiency and reduced downtime, but also mitigate financial exposure due to a decrease in measurement uncertainty and improved accuracy. Depending on the size and complexity of the equipment, the annual financial benefit can be as high as hundreds of thousands of dollars.

Customers around the world depend on Daniel to provide professional assistance to optimize flow and energy measurement performance. Daniel's market leadership is backed by over 75 years of flow measurement expertise.

Optimize performance

An equipment and systems audit by Daniel's factory certified measurement technicians is an ideal way to optimize flow and energy measurement performance. Daniel has the experience and diagnostic tools necessary to perform the following actions and provide these benefits:

- **Verification that the metering equipment is performing within specifications**
- **Recommendations to improve measurement accuracy**
- **Best practices for reducing operating and maintenance costs**
- **Detailed reports of the audit results**
- **Recommendations of cost-effective alternatives for future performance improvements**

In most cases, the cost of an audit and remedial actions will equate to a small fraction of the annual cost of operational inefficiencies.

Whether your system has been recently commissioned or has been in service for a longer period of time, a metering equipment audit from Daniel can be a major step toward improving your business bottom line.

Sustain your equipment

Partnering with Daniel for an equipment audit is a proven way to ensure a comprehensive health check of your metering operation. Daniel's Metering Equipment Audit Service provides the following deliverables:

- ✓ Complete check of all metering system equipment and components
- ✓ Review of operational and maintenance procedures
- ✓ Assessment of operator knowledge
- ✓ Safety assessment
- ✓ Performance "health check" of primary measurement devices
- ✓ System performance assessment
- ✓ Operational wear and tear analysis
- ✓ Detailed audit report which contains recommendations for:
 - ✓ Operations and maintenance procedures
 - ✓ Operator training
 - ✓ Product upgrades
 - ✓ Software / control system upgrades
 - ✓ Cost / benefit analysis

Get started today

Daniel's highly trained certified technicians are located worldwide, providing you with service and support in more than 80 countries.

For a Metering Equipment Audit quotation customized to meet your particular needs, please contact your nearest Daniel Measurement and Control Sales and Service office as indicated below, or submit a service request online at <http://www.daniel.com/service/servicerequest.htm>.

You may find these Service sheets valuable:

Compact Prover Inspection and Refurbishment

Meter Inspection and Recertification

Keeping you at peak performance

Daniel is the world leader in custody transfer and fiscal flow measurement products, systems and services. We understand the importance of your flow metering measurement, and in an environment of volatile oil and gas prices, the financial risk due to measurement uncertainty is greater than ever before. That's why Daniel is committed to helping reduce your metering equipment uncertainty anytime and anywhere.

Our global reach, broad range of services and certified service specialists supported by over 75 years of oil and gas industry experience enable Daniel to support you for the life of your metering installations – and that's a certainty.
