## Rosemount 648 Wireless Temperature Transmitter

### Industry-leading temperature transmitter delivers field reliability as a wireless measurement solution

- Superior accuracy and stability
- Single sensor capability with universal sensor inputs (RTD, T/C, mV, ohms)
- Transmitter-Sensor Matching with Callendar-Van Dusen
- IEC-approved WirelessHART® protocol
- Dual-compartment housing, available in aluminum or stainless steel
- Large LCD display
- Extended Range Antenna options available

### Achieve optimal efficiency with Best-in-Class product specifications and capabilities

- Two-year stability rating reduces maintenance costs
- Transmitter-Sensor Matching eliminates the interchangeability error of sensors, improving measurement point accuracy by 75%
- User-centric Device Dashboards communicate important diagnostics and ensure process health
- Compensation for ambient temperature enhances transmitter performance
- Dual-compartment housing provides the highest reliability in harsh industrial environments

### A standard diagnostic offering increases measurement reliability and provides visibility into process conditions

- Four user-configurable alerts provide increased process information and measurement point insight
- Open/short sensor diagnostics assist with detecting issues in sensor loops
- The terminal temperature feature verifies the installation location temperature conditions to ensure optimal transmitter operation

## Smart Wireless delivers innovative wireless solutions for temperature measurement and overall transmitter performance

- Self-organizing network delivers information rich data with >99% data reliability and establishes a highly stable network
- Smart Wireless capabilities extend the full benefits of PlantWeb® to previously inaccessible temperature measurement locations
- Emerson SmartPower™ Solutions provide an intrinsically safe Power Module, allowing field replacements without removing the transmitter from the process, keeping personnel safe, and reducing maintenance costs
- Emerson Process Management's layered approach to wireless network security ensures that data transmissions are secure

## Explore the benefits of a Complete Point Solution from Rosemount Temperature Measurement

- An "Assemble To Sensor" option enables Emerson to provide a complete point temperature solution, delivering an installation-ready transmitter and sensor assembly
- Emerson offers a selection of RTDs, thermocouples, and thermowells that bring superior durability and Rosemount reliability to temperature sensing, complementing the Rosemount Transmitter portfolio

## Experience global consistency and local support from numerous worldwide Rosemount Temperature manufacturing sites

- World-class manufacturing provides globally consistent product from every factory and the capacity to fulfill the needs of any project, large or small
- Experienced Instrumentation Consultants help select the right product for any temperature application and advise on best installation practices
- An extensive global network of Emerson service and support personnel can be on-site when and where they are needed

- 
- Make wireless installation and configuration easy with the **Emerson Smart Wireless Gateway**.
  - For installations that have a high number of temperature measurements in close proximity, consider the **Rosemount 848T** High Density temperature transmitter.
  - Explore how Emerson's intrinsically safe **SmartPower Solutions** reduce maintenance costs.

## Rosemount 648 Temperature Transmitter

The Rosemount 648 Wireless Temperature transmitter delivers industry-leading temperature field reliability as a wireless process measurement with Best-in-Class specifications and capabilities.

Transmitter features include:

- IEC-approved WirelessHART protocol (Option Code WA3)
- External Antenna (Option Code WK1)
- Extended Range, External Antenna (Option Code WM1)
- Large LCD Display (Option Code M5)
- Transmitter-Sensor Matching (Option Code C2)
- 3-Point Calibration Certificate (Option Code Q4)
- Assemble to Sensor (Option Code XA)

(1) When ordering a Rosemount 648 with the XA option, a mounting bracket is not included. If a bracket is required, please order option code B5.

## Transmitter Specifications

### Functional Specifications

#### Input

Supports Thermocouple, RTD, millivolt, and ohm input types. See "Transmitter Accuracy" on page 8 for sensor options.

#### Output

IEC 62591 (WirelessHART), 2.4 GHz DSSS

#### Local Display

The optional five-digit integral LCD Display can display sensor temperature in engineering units (°F, °C, °R, K, Ω, and millivolts) and percent of range. The display updates based on the Wireless Update Rate.

#### Humidity Limits

0–99% Non-condensing Relative Humidity

#### Update Rate

WirelessHART, user-selectable 1 second to 60 minutes

#### Accuracy

(Pt 100 @ reference condition: 20 °C)  
±0.225 °C (±0.405 °F)

#### Radio Frequency Power Output from Antenna

External Antenna (WK1 option): Maximum of 10 mW (10dBm) EIRP

### Physical Specifications

#### Electrical Connections

##### Power Module

The Emerson SmartPower™ Power Module is field replaceable, featuring keyed connections that eliminate the risk of incorrect installation.

The Power Module is an Intrinsically Safe solution, containing Lithium-thionyl chloride with a polybutadine terephthalate (PBT) enclosure.

The 648 Wireless has Power Module life time rating of 10 years with a one-minute update rate, at reference conditions.<sup>(1)</sup>

##### Sensor Terminals

Sensor terminals permanently fixed to terminal block

#### Field Communicator Connections

##### Communication Terminals

Clips permanently fixed to terminal block, designated by the text "COMM."

#### Materials of Construction

##### Enclosure

Housing - Low-copper aluminum or stainless steel

Paint - Polyurethane

Cover O-ring - Buna-N

##### Terminal Block and Power Module

PBT

##### Antenna

PBT/Polycarbonate (PC) integrated omnidirectional antenna

#### Mounting

Transmitters may be attached directly to the sensor. Mounting brackets also permit remote mounting. See "Dimensional Drawings" on page 12.

#### Weight

Low-copper Aluminum:

648 without LCD - 4.1 lb. (1.9 kg)

648 with M5 LCD - 4.2 lb. (2.0 kg)

Stainless Steel:

648 without LCD - 8.0 lb. (3.5 kg)

648 with M5 LCD - 8.1 lb. (3.6 kg)

#### Enclosure Ratings (648)

Housing Style option codes D and E are Type 4X and IP66/67 rated dual-compartment housings.

### Performance Specifications

#### ElectroMagnetic Compatibility (EMC)

##### All Models:

Meets all relevant requirements of EN 61326-1; 2006; EN 61326-2-3; 2006

#### Transmitter Stability

The 648 has a stability of ±0.15% of output reading or 0.15 °C (whichever is greater) for 24 months.

#### Self Calibration

The analog-to-digital measurement circuitry automatically self-calibrates for each temperature update by comparing the dynamic measurement to extremely stable and accurate internal reference elements.

#### Vibration Effect

No effect when tested per the requirements of IEC60770-1 (1999):

**High Vibration Level** - field or pipeline (10-60 Hz 0.21 mm displacement peak amplitude / 60-2000 Hz 3g).

(1) Reference conditions are 70 °F (21 °C), and routing data for three additional network devices.

NOTE: Continuous exposure to ambient temperature limits (-40 °F or 185 °F; -40 °C or 85 °C) may reduce specified life by less than 20 percent.

(1) Change in ambient is with reference to the calibration temperature of the transmitter 68 °F (20 °C) from factory.

Transmitters can be installed in locations where the ambient temperature is between –40 and 85 °C (–40 and 185 °F). In order to maintain excellent accuracy performance, each transmitter is individually characterized over this ambient temperature range at the factory.

### Temperature Effects Example

When using a Pt 100 ( $\alpha = 0.00385$ ) sensor input at 30 °C ambient temperature:

- Digital Temperature Effects:  $0.0045$  °C  $\times$  (30 – 20) = 0.045 °C
- Worst Case Error: Digital + Digital Temperature Effects = 0.225 °C + 0.045 °C = 0.27 °C
- Total Probable Error:  $\sqrt{0.225^2 + 0.045^2} = 0.23$

## Product Certifications

### Approved Manufacturing Locations

Rosemount Inc. – Chanhassen, Minnesota, USA  
Emerson Process Management GmbH & Co. - Karlstein, Germany  
Emerson Process Management Asia Pacific Private Limited - Singapore

### European Union Directive Information

The current Declaration of Conformity is located at the end of this document. The most recent revision of the European Union Declaration of Conformity can be found at [www.emersonprocess.com](http://www.emersonprocess.com).

#### *ATEX Directive (94/9/EC)*

Emerson Process Management complies with the ATEX Directive.

#### *Electro Magnetic Compatibility (EMC) (2004/108/EC)*

Emerson Process Management complies with EMC Directive.

#### *Radio and Telecommunications Terminal Equipment Directive (R&TTE)(1999/5/EC)*

Emerson Process Management complies with the R&TTE Directive.

### Telecommunication Compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification. Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

### FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation.

This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

### Ordinary Location Certification for FM

As standard, the transmitter has been examined and tested to determine that the design meets basic electrical, mechanical, and fire protection requirements by FM, a nationally recognized testing laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

### Hazardous Locations Certificates

#### North American Certifications

##### Factory Mutual (FM) Approvals

I5 FM Intrinsically Safe, Non-incendive, and Dust Ignition-proof  
Certificate Number: 3027705  
Intrinsically Safe for Class I/II/III, Division 1, Groups A, B, C, D, E, F, and G.  
Zone Marking: Class I, Zone 0, AEx ia IIC  
Temperature Codes: T4 ( $T_{amb} = -50$  to  $70$  °C)  
T5 ( $T_{amb} = -50$  to  $40$  °C)  
Non-incendive for Class I, Division 2, Groups A, B, C, and D.  
Temperature Codes: T4 ( $T_{amb} = -50$  to  $70$  °C)  
T5 ( $T_{amb} = -50$  to  $40$  °C)  
Dust Ignition-proof for Class II/III, Division 1, Groups E, F, and G.  
Ambient temperature limits: -50 to 85 °C

Enclosure: Type 4X/IP66/IP67

Intrinsically Safe and Non-incendive when installed in accordance with Rosemount drawing 00648-1000.

For use with Rosemount Power Module P/N 753-9220-XXXX only.

N5 FM Non-incendive and Dust Ignition-proof  
Certificate Number: 3027705

Dust Ignition-proof for Class II/III, Division 1, Groups E, F, and G.  
Ambient temperature limits: -50 to 85 °C

Enclosure: Type 4X/IP66/IP67

For use with Rosemount Power Module P/N 753-9220-XXXX only.

#### Canadian Standards Association (CSA)

I6 CSA Intrinsically Safe  
Certificate Number: 1143113  
Intrinsically Safe for Class I, Division 1, Groups A, B, C, and D.  
Temp Code T3C

Enclosure: Type 4X/IP66/IP67

Intrinsically Safe when installed per Rosemount drawing 00648-1020.

For use with Rosemount Power Module P/N 753-9220-XXXX only.

# Product Data Sheet

July 2011

# Rosemount 648

## European Certifications

- I1 ATEX Intrinsic Safety  
 Certificate Number: Baseefa07ATEX0011X  
 II 1G  
 Ex ia IIC T4 ( $T_{amb} = -60\text{ °C to }70\text{ °C}$ )  
 Ex ia IIC T5 ( $T_{amb} = -60\text{ °C to }40\text{ °C}$ )  
 Enclosure: IP66/IP67  
 CE 1180

Table 4. Sensor Parameters

Sensor
$U_o = 6.6\text{ V}$
$I_o = 26.2\text{ mA}$
$P_o = 42.6\text{ mW}$
$C_o = 11\text{ uF}$
$L_o = 25\text{ mH}$

For use with Rosemount Power Module P/N 753-9220-XXXX only.

### Special Conditions for Safe Use (X)

- The surface resistivity of the antenna is greater than one gigaohm. To avoid electrostatic charge build-up, it must not be rubbed or cleaned with solvents or a dry cloth.
- The Power Module may be replaced in a hazardous area. The Power Module has surface resistivity greater than one gigaohm and must be properly installed in the wireless device enclosure. Care must be taken during transportation to and from the point of installation to prevent electrostatic charge build-up.

## International Certifications

- I7 IECEx Intrinsic Safety  
 Certificate Number: IECEx BAS 07.0007X  
 Ex ia IIC T4 ( $T_{amb} = -60\text{ °C to }70\text{ °C}$ )  
 Ex ia IIC T5 ( $T_{amb} = -60\text{ °C to }40\text{ °C}$ )  
 Enclosure: IP66/IP67

Table 5. Sensor Parameters

Sensor
$U_o = 6.6\text{ V}$
$I_o = 26.2\text{ mA}$
$P_o = 42.6\text{ mW}$
$C_o = 11\text{ uF}$
$L_o = 25\text{ mH}$

For use with Rosemount Power Module P/N 753-9220-XXXX only.

### Special Conditions for Safe Use (X)

- The surface resistivity of the antenna is greater than one gigaohm. To avoid electrostatic charge build-up, it must not be rubbed or cleaned with solvents or a dry cloth.
- The power module may be replaced in a hazardous area. The power module has surface resistivity greater than one gigaohm and must be properly installed in the wireless device enclosure. Care must be taken during transportation to and from the point of installation to prevent electrostatic charge build-up.

## Japanese Certifications

- I4 TIIS Intrinsic Safety  
 Certificate Number: TC18638  
 Ex ia IIC T4 ( $T_{amb} = -20\text{ °C to }60\text{ °C}$ )  
 Various configurations available. Consult factory for certified assemblies.

## China (NEPSI) Certifications

- I3 China Intrinsic Safety  
 Certificate Number: GYJ071412  
 Ex ia IIC T4/T5

### Special Conditions for Safe Use:

- The temperature class depends on ambient temperature range as follows:

Temperature Class	Ambient Temperature Range
T4	(-55 to 70) °C
T5	(-55 to 40) °C

- Safety Parameters:

$U_o = 6.6\text{ V}$   
 $I_o = 26\text{ mA}$   
 $P_o = 42.6\text{ mW}$   
 $C_o = 11\text{ uF}$   
 $L_o = 25\text{ uH}$

- The cable entry of wireless temperature transmitter should be protected to ensure the degree of protection of the enclosure IP 20 (GB4208-1993) at least.
- Associated apparatus should be installed in a safe location, and during installation, operation, and maintenance, the regulations of the instruction manual have to be strictly observed.
- End users are not permitted to change any components inside.
- During installation, use, and maintenance of the wireless temperature transmitter, observe the following standards:
  - GB3836.13-1997 "Electrical apparatus for explosive gas atmospheres Part 13: Repair and overhaul for apparatus used in explosive gas atmospheres"
  - GB3836.15-2000 "Electrical apparatus for explosive gas atmospheres Part 15: Electrical installations in hazardous area (other than mines)"
  - GB3836.16-2006 "Electrical apparatus for explosive gas atmospheres Part 16: Inspection and maintenance of electrical installation (other than mines)"
  - GB50257-1996 "Code for construction and acceptance of electric device for explosion atmospheres and fire hazard electrical equipment installation engineering"
